Profile

Full-Stack Web Developer with expertise in Ruby on Rails and React, and a strong foundation in backend development and clean code principles. Skilled at collaborating in cross-functional teams and delivering scalable, robust solutions for diverse business needs. Proficient in implementing advanced payment logic, dynamic pricing models, and accounting systems.

Experience

Full Stack Developer – Vinko

2019 – 2024

In charge of developing, testing, refactoring, and reviewing features for Vform, an app to manage application processes for competitive funds for institutions or companies.

- Optimized company costs by transitioning the email status monitoring service to a custom tool using AWS Lambda, SQS, and SNS, integrating data into a Ruby on Rails application.
- Built a ZIP file generator with Ruby to consolidate application files into a single downloadable resource, utilizing AWS S3 for storage and Sidekiq processing.
- Developed conditional logic for custom forms with nested question functionality, tackling graph-based behavior challenges.
- Implemented advanced payment logic and analytics, generating performance-focused SQL-driven graphs for application processes.
- Designed and deployed dynamic pricing features to support user-specific pricing rules, along with robust discount management systems.
- Built and maintained Convoca, a project promoting social causes, with a stack including Ruby on Rails, PostgreSQL, React, and TypeScript.
- Developed an app using Rails to create and administrate study materials for the faculty of religion of the Catholic University of Chile

Freelancer - Project: Veterinary Intranet Application

2018 – 2019

- Developed an intranet application for medical record and logistics management, using Ruby on Rails, PostgreSQL, and AWS S3.
- Deployed the application on Heroku, ensuring high availability and scalable performance.
- Enhanced user experience through data visualization features tailored for veterinary professionals.

Education

Internship – Nisum **2018**

- Practiced agile methodologies in team environments, focusing on documentation and transparent collaboration.

Internship – Ki Technology **2018**

- Gained expertise in UX design processes and responsive web design principles.

Full Stack Developer Bootcamp – Desafío Latam **2018 - 2019**

Technical Skills

- **Languages:** Ruby, JavaScript, TypeScript.
- **Technologies:** Ruby on Rails, React, REST API, PostgreSQL, JQuery, Node.js.
- **Other:** Mini Test, Heroku, Git, AWS S3, Writing.
